## AMENDMENT TO THE CLAIMS

Please amend the Claims as follows:

- ---Claims 1-11. (Cancelled)
- ---Claim 12. (Previously amended) A cross-linked hyaluronic acid derivative according to Claim 18 wherein the hydroxy groups of said hyaluronic acid derivative are sulphated or hemisuccin-ylated.---
  - ---Claims 13 and 14 (cancelled)
- ---Claim 15 (previously amended) A pharmaceutical composition useful as (a) a substitute for synovial fluid in the treatment of osteoarthritic conditions and for vitreous humor in the treatment of pathologies and side effects connected in ophthalmic surgery; (b) as a base for artifical tears formulation; (c) as a controlled release matrix of a medicament; and (d) as a healing and antiadhesive agent, in which the principal active ingredient is a cross-linked hyaluronic acid derivative according to Claim 18.
- ---Claim 18 (currently amended) A hyaluronic acid derivative comprising cross-linked molecules of hyaluronic acid obtained by the reaction of the carboxylic acid groups of a hyaluronic acid wherein the cross-linkage occurs only through amide bonds between carboxy groups of the hyaluronic acid and the amide amino groups of a diamine of the formula  $NH_2-A-NH_2$  wherein A is a linear  $C_2-C_6$  chain or a polyoxyalkylene chain of the formula  $[(CH_2-O-CH_2)_2]_m$  wherein m is an integer from 2-10.

--19 (Previously added) A hyaluronic acid derivative according to Claim 18 in which the  $C_{2^-6}$  chain is optionally substituted by hydroxy, carboxy, halogen, alkoxy and amino groups, a polyoxy-alkylene chain  $[(CH_2)_2-O-CH_2)_2]_m$  in which m is an interger from 2-10, 1,4 or 1,3 disubstituted benzene; and  $R_1$  and  $R_2$ , which are the same or different, are hydrogen,  $C_1-C_6$  alkyl, phenyl or benzene groups.
